### Education

Master of Computer Applications

Oct. 2024 – Jun. 2026

Jadavpur University, Kolkata

Bachelor of Science (Hons.) in Computer Science

Sep. 2021 – Apr. 2024

St. Xavier's College (Autonomous), Kolkata

CGPA: 7.70/10.0

### Technical Skills

Programming Languages: C, C++, Java, JavaScript

Web Technologies: HTML5, CSS3, React.js, Node.js, Express.js, Bootstrap Tools & Platforms: Git, GitHub, VS Code, Linux, Windows, Kaggle

Concepts: Data Structures, Algorithms, Object-Oriented Programming (OOP), Operating Systems (OS), Database

Management Systems (DBMS), Web Development, Full-Stack Development

### **Projects**

# Zypher - Secure Text and File Sharing Web Application

2025

github.com/Shahmeer24/zypher

React.js, Node.js, Express.js, Multer, Archiver

- Created a secure, interactive web application for seamless text and file sharing without the need for user accounts or sign-ups.
- Implemented auto-expiry functionality, ensuring all shared content is automatically deleted after 10 minutes to enhance privacy and security.
- Added support for multiple file uploads, with automatic compression into a ZIP archive to simplify file transfers.

## taskHub - Task Management Web Application

2025

github.com/Shahmeer24/taskHub

JavaScript, HTML5, CSS3, Bootstrap

- Built an interactive and responsive task management web application to help users organize and track their tasks efficiently.
- Implemented task prioritization with color-coded labels for better task management.
- Integrated localStorage for data persistence, ensuring tasks remain saved across user sessions.

#### Amantran Group Hospitality Website

2024

github.com/Shahmeer24/amantran-hotels

HTML5, CSS3, JavaScript, Bootstrap

- Designed a modern and interactive website (frontend) for Amantran Group, a hotel and hospitality business.
- Focused on enhancing user engagement and brand presence through intuitive design.
- Implemented a responsive UI/UX, ensuring smooth navigation across devices.

### Speech Sentiment Analysis Research

2024

github.com/Shahmeer24/Sentiment-Analysis-from-Speech

Python, TensorFlow, scikit-learn, NumPy

- Conducted research on Machine Learning-based Sentiment Analysis as a final-year dissertation project.
- Utilized feature-extraction techniques to analyze and classify sentiments from speech data.
- Presented findings, methodology, and results in an academic setting.
